# Get ready to use your EFLW802W Front Load Washing Machine

## Washing Programs

### COTTON

The Cotton washing program is suitable to wash durable, heat-resistant textiles made of cotton or linen.

### STEAM WASH

Suitable for daily laundry items like cotton and synthetics, harnesses the power of steam to deeply penetrate fibers, effectively eliminating bacteria and germs, preventing odours, and ensuring a hygienic clean to protect your health.

### SYNTHETICS

Designed to effectively and gently clean synthetic fabrics, such as polyester and nylon whilst preventing possible damage.

### MIXED

Suited for mixed fabric loads that require a more intense cleaning cycle. Ensure label warnings on garments are conformed to.

### DENIM

Suitable for washing all types of denim.

### ECO WASH

Using lower temperatures and less water over a longer time than the standard Cotton program. By using less energy over an extended period makes it more economical.

### 20 °C

The 20 °C washing program efficiently cleans lightly soiled cotton laundry with optimal results at a low temperature.

### SPIN

This setting can be used after a wash to remove excess water.

### RINSE & SPIN

This program simply rinses the load and then spins it.

### BULKY

Designed to effectively clean and refresh large, bulky items such as bedding, comforters, and pillows, ensuring thorough cleanliness and care.

### BABY

Providing a gentle yet effective wash, catering to the delicate fabrics and sensitive skin of baby clothing, ensuring a thorough clean and maintaining the softness and comfort.

### WOOL

Suitable for hand or machine-washable wool and rich wool textiles, features an especially gentle wash program with longer pauses to prevent shrinkage, allowing textiles to rest in the washing liquid for a thorough yet careful cleaning process.

### SPORTWEAR

Crafted to launder activewear and sports wear with precision, with specialised wash motions and lower temperatures to maintain fabric elasticity, eliminate sweat, and ensure optimal hygiene for your fitness and active lifestyle.

### RAPID 45'

Suitable to wash lightly dirty clothes quickly.

### QUICK 15'

Suitable for light loads with light soiling of which you would like to be cleaned quickly. This setting performs better when loaded lightly, as it is a fast spin.

Please refer to the user manual pages 10–16 for more detailed Operating Instructions.
