## The Functions

**Oven Light:** Enables the user to observe the progress of cooking without opening the door.

**Bake (Conventional):** Ideal for cakes, pizza & cookies.

**Steam Cleaning:** Loosen dirt & grease with steam before cleaning your oven. Please read the instructions in your User manual before using this function.

**Upper Heat:** Ideal for heating pre-baked pastries and small amounts of food, or if you want to gratinate your dish.

**Grill:** This cooking method is normal grilling, utilising the grill element only. Add a little water to reduce dryness.

**Grill & Fan:** Suitable for grilling large amount of meat on a lower rack within the oven. Add a little water to reduce dryness.

**Fan Bake:** Evenly distributes heat within the cavity for baking & roasting on a single tray.

**Fan Forced:** Evenly distributes heat within the cavity for cooking on multiple shelves. Suitable for baking & roasting at temperatures lower than the Bake (Conventional) function.

**Fan Assist:** Circulates the air within the oven cavity.
