### Installation Tips

- Two person installation: Use two or more people to move and install the appliance. Failure to do so can result in back or other injury.
- Freestanding design: This appliance is designed to be freestanding only, and should not be recessed or built-in.
- Placement: This appliance must be properly positioned on a dry, sturdy, level surface that is strong enough to support it when it is fully loaded. It should be placed in an indoor area that is well ventilated and away from direct sunlight.
- Ambient temperature: The ambient temperatures must correspond to the climate class (T) indicated on the rating plate of the appliance.
- Clearances: Ensure that air can circulate freely around the back of the cabinet, which is necessary to cool the compressor and condenser. Allow at least 10cm clear space at the back, 10cm at the sides of the unit and 30cm between the top and any surface above.

Note: For further installation instructions please refer to the user manual pages 8–11.

---

### First Use

When starting up for the first time, keep the refrigerator still for two hours before connecting it to power supply.

Before putting any fresh or frozen foods in the fridge, ensure the fridge has run for 2–3 hours, or for at least 4 hours in summer when the ambient temperature is high.

---

### Temperature Control

The temperature controls are located on the outside of the fridge. This unit can operate as a fridge or a freezer. To alternate between fridge or freezer mode, hold the Fridge/Freezer mode button for 3 seconds.

For further Operating Instructions, refer to the user manual pages 13–15.
